

EOC – 3220 PLUS

Wireless Bridge/Client Router/AP/Repeater

2.4 GHz

802.11 b/g

54 Mbps

The Wireless Bridge/Client Router/Access Point/Repeater operates seamlessly in the 2.4 GHz frequency spectrum supporting the 802.11b (2.4GHz, 11Mbps) and faster 802.11g (2.4GHz, 54Mbps) wireless standards.

EOC-3220 PLUS has high transmitted output power and high receivable sensitivity. High output power and high sensitivity can extend range and coverage to reduce the roaming between APs to get more stability wireless connection. It also can reduce the expense of equipment in the same environment.

To protect your wireless connectivity, it can encrypt all wireless transmissions through 64/128-bit WEP data encryption and also supports WPA/WPA2/802.1x. User isolation function can protect the private network between client users. The MAC addresses filter and IP/MAC tunneling lets you select exactly which stations should have access to your network.
